

JavaScript Assessment Test 3

Create new list item and add to DOM

- Extend the JavaScript code below to interact with the displayed HTML elements.
- Enter a new todo in the input field. Once you click the button, the new todo item should appear at the bottom of the list.

A screenshot of a web application interface for a todo list. It features a dark blue background. At the top, there is a white input field containing the text "add new" with a cursor at the end, and an orange "Add" button to its right. Below the input field is a light blue rectangular container holding a list of three items: "Read a book", "Lunch with Caro", and "Feed the dog", each on a separate line.

- Code should be properly explain with comments
- Use eventListener for storing data
- For finalise data store use cookies concepts
